- Marshals Fire Marshal Forums – NASFM & IFMA

NASFM & IFMA ADJOURN AT 5 PM

Thursday
August 1
2024

Travel Home Day for Attendees

2024 Theme

Bringing It All Together

NASFM is bringing it all together with plans to present a conference that partners with two other national organizations. First, the National Carbon Monoxide Awareness Association (**NCOAA**) who joined us last year to offer a unique opportunity focused on eradicating carbon monoxide poisoning and helping carbon monoxide poisoning survivors recover to lead a happy, healthy, and productive life.

The 2024 event promises to be an even better conference than ever before, now with an additional partner. The International Fire Marshal Association (**IFMA**), a section of the National Fire Protection Association (NFPA), representing more than 800 local fire marshals are joining NASFM's Symposium to bring it all together. The emerging issues facing both state and local fire marshals are the same, whether it's code enforcement, fire investigations, community risk reduction, or other issues, this is the platform to come together to network, share information, learn more about emerging issues, and form alliances between safety officials, industry leaders, and organizations.
